EDUCATION

Master of Science in Computer Science   January 2018 - May 2019
Florida State University   *Tallahassee, Florida*
Bachelor of Science in Computer Science   June 2013 - December 2017
Florida State University   *Tallahassee, Florida*
- Minors in Physics and Mathematics

PROFESSIONAL EXPERIENCE

Teaching Assistant/Mentor for Algorithms   September 2021 - December 2021
FSU Department of Computer Science   *Remote Work*
- Developed bash scripts to automate grading, allowing me to focus on evaluating students' code.
- Graded assignments, entered and maintained grades, gave valuable feedback.

Web Developer   February 2021 - Present
Freelance   *Remote Work*
- Developed web apps, sites, and micro-services for clients in a SaaS model.
- Utilized Docker, Python, Flask, HTML/CSS/JS, and SQL for many projects.

Python Developer   September 2020 - January 2021
Hibou Corp.   *Remote Work*
- Developed open source ERP modifications with Python and XML for clients.
- Contributed to Hibou's open source library.
- Created and modified applications utilizing the Odoo framework.
- Migrated software between various versions of Odoo.

Back-End Software Developer   June 2019 - June 2020
IBM - Cloud Division   *Durham, North Carolina*
- Collaborated remotely on a team of twenty spread globally throughout the US and China developing IBM's Next Gen Cloud services.
- Developed on bare metal infrastructure, modified Kubernetes controllers using Golang, and created work-flow improving scripts utilized by various teams in the department.

Graduate Teaching Assistant for Intro to C++ and Unix   January 2018 - May 2019
FSU Department of Computer Science   *Tallahassee, Florida*
- Developed Python scripts to automate grading, allowing me to focus on students' C++ run-time errors.
- Tracked attendance, proctored exams, graded homework, entered and maintained grades.
- Mentored students to success in additional office hours as well as exam preparation sessions.

PROJECTS

Master's Capstone Project   May 2018 - March 2019
A Non-Invasive Productivity Tracker for Programmers
- Developed a lightweight full-stack web application to monitor computer activity to isolate distracting behavior.
- Designed using Python, SQLite, and command-line tools to formulate trends and Flask to visualize the data.
- Achieved non-invasiveness through limited data gathering and not distributing any logged information.

TECHNICAL SKILLS

· Python	· C++	· Docker	· Flask	· Git
· Go	· Bash	· Odoo	· SQL	· HTML/CSS/JS
